

圓準股份有限公司

Smooth & Sharp Corporation

**No Chemical Process, No Plastic Inside,
Pure Paper, Brought to you by S&S**

圓準具有近15年生產RFID產品的毅力及恆心，順勢跨入軟性混合電子(Flexible Hybrid Electronics)的先進領域。藉由自行開發的倒封裝設備及完善的標籤製程，成功量產環保型RFID標籤，有別於過往化學鋁蝕刻製程，更環保、有彈性、簡化，使得S&S在軟性混合電子的領域中有良好的前景。藉由S&S自行研發的植晶設備，成功地在低溫基材植上電子元件，如LED等等。若有任何想法及相關的新興應用，歡迎您的參與及共同開發。

UHF RFID Tag

With nearly 15 years of RFID productive perseverance, S&S naturally entered the advanced process of FHE, **Flexible Hybrid Electronics**. By self-developed assembling equipment and integral label production, we realize the mass production of environmental friendly RFID labels. Compare to etching process, more environmental friendly, flexible and simplified manufacturing process destined S&S to have a good prospect. S&S successfully implanted electronic components like LEDs on low-temperature substrates by self-developed bonding machine. If any idea or related emerging application, welcome to join us and develop together.
